WTO ITC UNCTAD

World Tariff Profiles 2023

SPECIAL TOPICS

1. World Tariff Profiles: the evolution of market access over 16 years

2. MTN Categories: product classification for WTO trade statistics and policy analysis

About this publication

World Tariff Pro les is a co-publication of the WTO, ITC and UNCTAD on market access for goods. This annual publication provides comprehensive information on the tariffs and non-tariff measures imposed by over 170 countries and customs territories. Non-WTO members are included if data on the tariffs they applied in 2022 or 2021 are available in the databases of the WTO, ITC or UNCTAD.

For more information

The statistical tables included in this report can be downloaded from the WTO web site at www.wto.org/statistics

Disclaimer
The World Tariff Pro les and its contents are the sole responsibility of the WTO Secretariat, ITC and UNCTAD, except for the opinion pieces written by the external contributors, which are the sole responsibility of their respective authors. The publication does not re ect the opinions or views of members of the WTO, ITC and UNCTAD. The authors of the publication also wish to exonerate those who have commented upon it from responsibility for any outstanding errors or omissions.

General note and abbreviations

Abbreviations

AVG	Average
AG	Agricultural products
AVE	Ad valorem equivalent
HS	Harmonized System (nomenclature)
Max	Maximum duty
MFN	Most favoured nation
NAV	Non-ad valorem duty
Non-AG	Non agricultural products
SSG	Special safeguards
TL	Tariff line
UV	Unit value

Notations

–	Not applicable
0	= 0 (not rounded)
0.0	> 0 and < 0.05
100	= 100 (not rounded)
100.0	> 99.95 and < 100
Blank	Bound or applied duties and/or imports are not available at all for a given country or territory.
Italics	Maxima, based on AVE estimates are printed in italics; this also applies in cases when the ad valorem is part of a compound or mixed duty as ceiling or oor.
US$	United States dollar

The statistics related to applied tariffs and imports are calculated using data which are based on the HS nomenclature adopted by the country for the reference year. For statistics on bound tariffs, the calculations are based on the approved schedule of concessions of the WTO member. In previous issues of World Tariff Pro les, each schedule is based on the HS version which the member used when it acceded to the WTO. Starting with the 2010 issue of this publication, bound tariff statistics are based on the approved schedule of concessions for each member in the most recent HS version. This might have some implications on the historical series of various bound tariff indicators affected by the use of a different nomenclature. While the member's commitments have not changed as a result of the transposition, some aggregate statistics might have been affected as a consequence of the change to another HS version.

The classi cation of products into agricultural and non-agricultural is based on Annex 1 of the WTO Agreement on Agriculture which lists all products covered in the Agreement. The Annex enumerates HS codes that are subject to the agriculture negotiations in the WTO and are considered agricultural products. HS codes which are not in Annex 1 are subject to the non-agricultural market access negotiations and are considered non-agricultural products.

In the comparison of bound and applied duties within countries and across countries, the following caveats need to be taken into account besides that of the effects of different HS versions used and nomenclature breakdowns. These are: (1) binding coverage; (2) tariff bindings not fully implemented; and (3) AVEs.

- While binding commitments cover all agricultural products, in principle, this is not always the case for non-agricultural goods. There are a number of WTO members where the binding coverage for non-agricultural products is less – and sometimes much less – than 100 per cent. Also, a number of developed countries have not yet fully bound all the tariff lines in their schedules. Any comparison of bound and applied tariff indicators is only valid in cases of full binding coverage.
- For most WTO members, except the most recently acceded ones, all commitments dating back to the Uruguay Round have by now been implemented. In cases where commitments are not yet fully implemented, one may see MFN applied averages or maxima exceeding the corresponding bound duty indicators.
- Last but not least, the calculation of AVEs may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. In other cases, bound duties have been expressed in a way that is not directly comparable with the currently used applied duties. In a number of cases, the estimated MFN applied AVEs were adjusted when the corresponding bound tariff lines were de ned in ad valorem terms. In these cases, the corresponding bound ad valorem duty was used as ceiling for the AVE estimate.

WTO

The World Trade Organization (WTO) is the only global international organization dealing with the rules of trade between nations. At its heart are the WTO agreements, negotiated and signed by the bulk of the world's trading nations and rati ed in their parliaments. The goal is to help producers of goods and services, exporters, and importers conduct their business. The WTO's main function is to ensure that trade ows as smoothly, predictably and freely as possible. It does this by administering trade agreements, acting as a forum for trade negotiations, settling trade disputes, reviewing national trade policies, assisting developing countries in trade policy issues through technical assistance and training programmes and cooperating with other international organizations.

ITC

The International Trade Centre (ITC) is the joint agency of the World Trade Organization and the United Nations. ITC enables small business export success in developing countries by providing, with partners, sustainable and inclusive trade development solutions to the private sector, trade support institutions and policymakers. ITC's strategic objectives are to strengthen the international competitiveness of enterprises, to develop the capacity of trade service providers to support businesses, and to support policymakers in integrating the business sector into the global economy.

UNCTAD

Established in 1964, the United Nations Conference on Trade and Development (UNCTAD) promotes the development-friendly integration of developing countries into the world economy. UNCTAD has progressively evolved into an authoritative knowledge-based institution whose work aims to help shape current policy debates and thinking on development, with a particular focus on ensuring that domestic policies and international action are mutually supportive in bringing about sustainable development.

Introduction

The World Tariff Pro les is a joint publication of the WTO, ITC and UNCTAD devoted to market access for goods. This statistical yearbook contains a comprehensive compilation of the main tariff parameters for each of the 164 WTO members plus other countries and customs territories where data is available. Each tariff pro le presents information on tariffs imposed by each economy on its imports complemented with an analysis of the market access conditions it faces in its major export markets.

Statistics for all countries and territories are given in standardized tables which allow easy comparisons between countries/territories, between sectors and, speci cally for WTO members, between bound and applied tariffs as well. The calculations are based on national tariff schedules and imports in conformity with a standard Harmonized System (HS) nomenclature version. To the extent possible, ad valorem equivalents (AVEs) of non-ad valorem tariffs are estimated and are included in the estimation of tariff indicators. Nonetheless, certain caveats apply in the interpretation of these indicators and the reader is advised to read the methodological notes that precede the statistical tables.

The publication is presented in ve main parts. The rst part shows summary tariff and trade statistics for all countries and territories for all products, as well as a breakdown into agricultural and non-agricultural products. The second part shows for each of these countries and territories one full page with disaggregation by sectors and duty ranges. It also contains a section on the market access conditions faced in their respective major export markets. The third part covers information on non-tariff measures which are of increasing importance in international trade. The fourth part contains the special topics which present new subjects in each edition. The annexes are in part ve and include the data sources and the compilation of "Frequently Asked Questions".

The summary tariff tables in the rst part are designed to allow cross-country comparison as well as comparison of the levels of bound and applied duties. Apart from the standard indicators like tariff averages, maxima, percentage of duty-free tariff lines, peaks and non-ad valorem duties, it also contains indicators of tariff dispersion such as the number of distinct duties and the coef cient of variation. The calculation of these indicators is based, where applicable, on a pre-aggregation to HS six-digit subheadings, which leads to a standardization across countries and thus makes the comparisons more compatible.

Similarly, the summary trade table showing the imports and exports pro le facilitates the comparison of selected indicators among the economies listed. The statistics are presented by agricultural and non-agricultural sector as well as for the total economy. The indicators related to the exports pro le are based on mirror data reported by the importing economy.

The tariff pro les tables are divided into two blocks covering (A) the domestic market access protection and (B) the protection faced in the major export markets. In part A, information on bound and applied duties is shown by duty ranges and by sectors. Information for agricultural and non-agricultural duties is shown separately. In addition, there are indicators on the occurrence of special safeguards and on tariff quotas. In part B, the trade diversi cation and market access conditions in the ve major export markets are depicted, broken down into agricultural and non-agricultural products.

The third part contains the summary tables on anti-dumping actions, countervailing duties and safeguard measures. The new special topics presented on the fourth part are entitled "The evolution of market access over 16 years of World Tariff Pro les" and the second one is "Product classi cation for WTO trade statistics and policy analysis – Multilateral Trade Negotiations (MTN) Categories".

Tariff

Description of column headings

Column headings	Description or method of calculation
Year of MFN applied tariff	Calendar year or start of scal year
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is re ected by maintaining one decimal, i.e. 100.0.
Simple average	Simple average of the ad valorem or AVE HS six-digit duty averages.
Duty-free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a pro rata basis.
Non-ad valorem duties	Share of HS six-digit subheadings subject to non-ad valorem duties. When only part of the HS six-digit subheading is subject to nonad valorem duties the percentage share of these tariff lines is used.
Duties > 15 %	Share of HS six-digit subheadings subject to ad valorem duties or AVEs greater than 15 per cent. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a pro rata basis.
Duties > 3 × AVG	Share of HS six-digit subheadings subject to ad valorem duties or AVEs greater than three times the national average. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a pro rata basis.
Concessions not yet implemented in 2022	Share of HS six-digit bound subheadings not yet implemented in 2022. When only part of the HS six-digit subheading is covered by such duties the calculation is made on a pro rata basis.
Maximum duty	Maximum tariff line level ad valorem duty or AVE.
Number of distinct duty rates	Number of distinct duty rates. Nonad valoremduties are always treated as distinct because AVE calculations would always yield distinct AVEs. For this indicator, however, duties not provided are not included in the count.
Coef cient of variation	Standard deviation of tariff line duty rates divided by the simple tariff line level average of all duty rates. Includes only ad valorem duties or AVEs.
Number of MFN applied tariff lines	Total number of MFN applied tariff lines

Technical notes

Only duties and imports recorded under HS Chapters 01–97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-ad valorem duties are converted into ad valorem equivalents. The methodology used for the conversion is in Technical Annex B of World Tariff Profiles 2006.

Trade

Description of column headings

Column headings		Description or method of calculation
All indicators are calculated by sector and for all products.		
Imports Pro le	Trade Year	Calendar year or start of scal year for trade data noti ed by reporting country/territory.
	Value of imports	Total amount of imports in billion US$.
	Trade Weighted Average MFN Applied	HS six-digit MFN tariff averages weighted with HS six-digit import ows of the most recently available year.
	Duty-free imports	Share of imports of products for which the MFN duty is zero
Export pro le statistics are based on reported imports of partner markets from the country/territory for the year indicated in Part B of the country table. Thus, the data are limited only to markets with noti ed imports data.		
Exports Pro le	Diversi cation Index HS Chapter	Number of distinct HS chapters with trade ows after the exclusion of 5 per cent of smallest bilateral tariff line trade ows.
	Diversi cation Index HS 6-digit	Number of distinct HS 6-digit sub-headings with trade ows after the exclusion of 5 per cent of smallest bilateral tariff line trade ows.
	Applied Weighted Tariff Faced in Major Markets	Actual MFN or preferential tariff imposed by the ve major trading partners in each sector to the products they import from the country/territory (i.e., to the products exported by the country/territory).

Technical notes

The indicators related to the imports pro le are calculated from the reported imports data of the country. However, the exports pro le are based on mirror data or the imports reported by the partner from the country. Thus, only data of reporting partners are included in the calculation of indicators for the exports pro le.

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the rst six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are rst averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, nonad valorem duties are converted into ad valorem equivalents. The methodology used for the conversion is in Technical Annex B of World Tariff Pro les2006.

1. The information provided by the European Union covers its 27 member States from 1 February 2020.
2. The information provided by Switzerland covers Liechtenstein.
3. For statistics on bound tariffs of the UK, the calculations are based on the UK submission of its full Schedule in HS2017 which has not yet been approved by all members.

Part A.1
Tariffs and imports: Summary and duty ranges

Row titles	Description or method of calculation
Simple average nal bound	Simple average of nal bound duties excluding unbound tariff lines.
Simple average MFN applied	Simple average of MFN applied duties.
Trade weighted average MFN applied	HS six-digit MFN tariff averages weighted with HS six-digit import ows of the most recently available year.
Imports in billion US$	Imports in billion US$.
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. The percentage share is also presented separately for non-agricultural (Non-AG) tariff lines. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is re ected by maintaining one decimal, i.e. 100.0.
AG: Tariff quotas (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concession covered by tariff quotas. Partial coverage is taken into account on a pro rata basis.
AG: Special safeguards (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concessions with at least one tariff line subject to Special Safeguards (SSG). Partial coverage is taken into account on a pro rata basis.

Technical notes

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the rst six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are rst averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-ad valorem duties are converted into ad valorem equivalents. The methodology used for the conversion is in Technical Annex B of World Tariff Pro les 2006.

Download the data:
www.wto.org/statistics

Part A.2
Tariffs and imports by product groups

Column heading		Description or method of calculation
Final bound duties	AVG	Simple average of nal bound duties excluding unbound tariff lines
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a pro rata basis.
	Max	Highest ad valorem duty or calculated AVE within the product group
	Binding in %	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is re ected by maintaining one decimal, i.e. 100.0.
MFN applied duties	AVG	Simple average of MFN applied duties.
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a pro rata basis.
	Max	Highest ad valorem duty or calculated AVE within the product group
Imports	Share in %	Share of imports falling under product group
	Duty free in %	Share of MFN duty-free imports falling under product group in total imports in that product group. Partially duty-free subheadings are taken into account on a pro rata basis if tariff line imports are not available.

Frequency distribution by duty ranges

The shares by duty ranges in the frequency distribution are based on the pro rata shares of tariff line level duties in the standard HS six-digit subheadings. For example, if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20, then half of the HS six-digit subheading is allocated to the 5–10 range and the other half to the 15–25 range. The frequency distribution includes AVEs whenever those were calculated. The percentages by duty ranges add up to 100 per cent for MFN applied duties unless there are non-computable AVEs or missing tariff lines for which no separate category was allocated. For bound duties, the duty ranges add up to the percentage of the binding coverage unless there are non-computable AVEs or missing tariff lines. Please note that the use of different nomenclatures for bound and MFN applied duties affects the comparability of bound and MFN applied duty shares by frequency ranges.

When trade is available at the tariff line level, imports are allocated on a tariff line basis to the respective duty ranges. Otherwise, HS six-digit imports are allocated on a pro rata basis to duty ranges, e.g. if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20 then half of the HS six-digit imports are allocated to the 5–10 range and the other half to the 15–25 range.

Share of HS six-digit subheadings subject to non-ad valorem duties: when only part of the HS six-digit subheading is subject to non-ad valorem duties, the percentage share of these tariff lines is used.

Part B
Exports to major trading partners and duties faced

Column heading		Description or method of calculation
Bilateral imports	in Mill US$	Total imports of major partner countries
Diversi cation: 95 % trade in no. of	HS 2 digit	Number of HS Chapters with trade ows after exclusion of 5 per cent of smallest bilateral tariff line trade ows.
	HS 6 digit	Number of HS six-digit subheadings with trade ows after exclusion of 5 per cent of smallest bilateral tariff line trade ows
MFN Average of traded TL	Simple	Simple average of MFN duties based only on tariff lines with imports
	Weighted	Trade-weighted average MFN duty
Preference margin	Weighted	Trade-weighted average difference between the MFN duty and the most advantageous preferential duty. Tariff lines where either MFN or preferential duties cannot be expressed in ad valorem terms have been excluded.
Duty-free imports	TL in %	Duty-free tariff lines in per cent of all bilateral trade ows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a pro rata basis if tariff line imports are not available.
	Value in %	Share of duty-free trade in per cent of all bilateral trade ows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a pro rata basis if tariff line imports are not available.

Part A.1 Tariffs and imports: Summary and duty ranges

Summary		Total	Ag	Non-Ag	Non-WTO member	
Simple average final bound					Binding coverage:	Total
MFN applied						Non-Ag
Simple average	2022	6.6	10.0	6.1	Ag: Tariff quotas (in %)	
Trade weighted average					Ag: Special safeguards (in %)	
Imports in billion US$						

Frequency distribution		Duty-free	0 <= 5	5 <= 10	10 <= 15	15 <= 25	25 <= 50	50 <= 100	> 100	NAV
		Tariff lines and import values (in %)								in %
Agricultural products										
Final bound										
MFN applied	2022	9.0	40.5	20.6	23.0	4.5	0.7	1.4	0.3	23.5
Imports										
Non-agricultural products										
Final bound										
MFN applied	2022	17.4	41.9	29.2	10.7	0.7	0.0	0.0	0	6.4
Imports										

Part A.2 Tariffs and imports by product groups

Product groups	Final bound duties				MFN applied duties			Imports	
	AVG	Duty-free in %	Max	Binding in %	AVG	Duty-free in %	Max	Share in %	Duty-free in %
Animal products					18.7	14.5	80		
Dairy products					14.7	0	15		
Fruit, vegetables, plants					8.0	4.8	15		
Coffee, tea					5.3	29.2	13		
Cereals & preparations					9.4	3.5	68		
Oilseeds, fats & oils					6.6	15.9	17		
Sugars and confectionery					12.8	0	62		
Beverages & tobacco					20.3	4.0	249		
Cotton					0.0	100.0	0		
Other agricultural products					4.8	8.1	10		
Fish & fish products					6.9	1.6	63		
Minerals & metals					7.3	8.8	20		
Petroleum					4.4	12.7	5		
Chemicals					4.5	11.0	10		
Wood, paper, etc.					8.0	5.3	15		
Textiles					7.5	1.1	18		
Clothing					7.6	0	18		
Leather, footwear, etc.					5.6	10.2	15		
Non-electrical machinery					2.7	66.6	15		
Electrical machinery					4.2	46.5	18		
Transport equipment					8.8	13.9	20		
Manufactures, n.e.s.					7.1	22.6	20		

Part B Exports to major trading partners and duties faced

Major markets	Bilateral imports		Diversification		MFN AVG of		Pref.	Duty-free imports	
		in million US$	95% trade in no. of		traded TL		margin	TL	Value
			HS 2-digit	HS 6-digit	Simple	Weighted	Weighted	in %	in %
